# Contents

1. Duration of Egg Formation in Chickens During Heat Stress .......................... J. O. Nordstrom 1687
4. Nutritive Properties of Broiler Excreta as Influenced by Environmental Temperature, Collection Interval, Age of Broilers and Diet ................................. L. F. Kubena, F. N. Reece and J. D. May 1700
5. Effect of Some Convulsant Drugs on the Electroencephalogram Recorded from the Wulst of the Adult Chicken and Pigeon under Curarized Conditions .......... T. Ookawa 1704
7. Kinetic Analysis of Chicken Immunocytes with the Allogeneic In Vivo Antibody Assay .... F. Seto 1714
8. Blood Pressure and its Genetic Variation and Co-variation with Certain Economic Traits in Egg Type Chickens .............................. K. G. Hollands and E. S. Merritt 1722
10. Low Density Lipoproteins of Chicken, Turkey and Quail Egg Yolk .......................... W. L. Bacon, K. I. Brown and M. A. Musser 1741
11. Pre-laying Use of Reserpine for Control of Light Refractoriness in Young Turkey Females .......... J. A. Harper and J. E. Parker 1745
14. Development of Puberty in Nigerian and White Leghorn Cockerels ........................ T. A. Aire 1765
16. Comparative Efficacy of Intermittent and Continuous Feeding of Four Antibiotics at Low Levels in Broilers .............................. W. L. Marusich, E. F. Ogrinz, P. R. Brown and M. Mitrovic 1774
17. The Effect of Feed Consumption on the Survival Time of Adult Turkey Hens Under Conditions of Acute Thermal Stress ...................... H. J. Kohn, M. A. Boone and J. E. Jones 1780
18. Abnormal Yolk Color and Mottling Caused by Dietary Tannic Acid and ........................ R. J. Hughes 1784
19. Pigmentation of Egg Yolks by Xanthophylls from Corn, Marigold, Alfalfa and Synthetic Sources .............................. E. Guenthner, C. W. Carlson, O. E. Olson, G. O. Kohler and A. L. Livingston 1787

---

**MANUSCRIPTS FOR PUBLICATION**

The official publication of the Poultry Science Association, Inc. A bi-monthly journal published for the purpose of advancing the scientific study of poultry. Manuscripts for publication should be sent to H. D. Branion, Editor, Poultry Science, Assistant to the President, University of Guelph, Guelph, Ontario, Canada N1G2W1. All manuscripts should be typewritten and double spaced. An original and a copy are required. An abstract should follow the name and address of the author(s), and preceding the Introduction. A Summary or Conclusions section should not be included. References should be arranged alphabetically, Tables and legends for figures must be typed on separate sheets. A charge of twenty dollars per printed page or fraction thereof is made to partially cover composition costs.

**SUBSCRIPTIONS AND ADVERTISING**

The subscription rate is thirty-five dollars ($35.00) annually in advance, single copies are $6.50. The journal is sent to all members of the Poultry Science Association, Inc. in good standing. All subscriptions should be sent to C. B. Ryan, Secretary-Treasurer, The Poultry Science Association, Inc., Texas A and M University, College Station, Texas 77843. The advertising rate is $200 per page. All advertising contracts and copy should be sent to C. B. Ryan, Secretary-Treasurer, The Poultry Science Association, Inc., Texas A and M University, College Station, Texas 77843. Copyright 1973 by the Poultry Science Association.
20. The Structure of the Chicken Egg Shell Membranes as Studied with the Scanning Electron Microscope and Energy Dispersive X-Ray Microanalysis

21. Effect of Temperature on Inhibition of Chicken Liver Fructose Diphosphatase by Adenosine 5'-Monophosphate

22. Effect of Diet and Light During the Pre-Breeder Period, and of Diet During the Breeder Period on Turkey Breeder Performance

23. The Effect of pH and Heat on the Ultrastructure of Thick and Thin Hen's Egg Albumen

24. Nucleic Acid and Nucleoprotein Content of Avian Erythrocyte Nuclei

25. Comparison of Amino Acid Content and Availability of Different Soybean Varieties in the Broiler Chick

27. Fly Pupae as a Dietary Ingredient for Starting Chicks

28. Composition of Shell Waste from Egg Breaking Plants

29. Toxicity of Various Selenium Derivatives to Chick Embryos

30. Spondylopathy in Broilers. Case Reports

31. The Effects of T-2 Toxin in Broiler Chickens

32. Influence of Oxytetracycline Supplementation on the Response of Chicks to Inorganic Sulfate

33. The Effects of Dietary Vitamin C, Protein, Strain and Age on Egg Quality, Production and Serum and Albumen Protein of Chickens

34. The Use of Heat Treated Meat in Chicken Frankfurters

35. Utilization of Different Varieties of Raw Soybeans by Male and Female Chicks

36. Ovarian Development and Ovulation in Hens Treated with Synthetic (Porcine) Luteinizing Hormone Releasing Hormone/Follicle Stimulating Hormone Releasing Hormone (LH-RH/FSH-RH)

37. Effects of Estrogen and Progestogen on the Cardiovascular and Endocrine Systems of Turkeys

38. Lack of Growth Response of Eight-week-old Broilers to Certain Antibiotics

39. Interactions of Ca, P, Zn and Alkaline Phosphatase in the Chick

40. Dietary Chloride Requirement of Starting Turkeys

41. Effect of Mycoplasma Synoviae on Broiler Performance

42. Acceptability of Freeze-Dried Pheasant Meat

43. Parameters of Infection in Chicks Exposed to Marek's Disease by Two Different Methods

44. Effect of Thyroprotein Feeding on Performance of Dwarf White Leghorn Pullets

45. Pathological Effects of Dietary Rapeseed Oils with High or Low Erucic Acid Content

46. Full-Fat Soybeans for Growing and Finishing Large White Turkeys. 1

47. Full-Fat Soybeans for Growing and Finishing Large White Turkeys. 2

48. Some Physiological Responses of Turkeys Selected for High and Low Adrenal Response to Cold Stress

49. Drug Resistance and R Factors Among Enterobacteria Isolated from Eggs

50. Effect of Dietary Folic Acid Deficiency on Serine-Glycine Interconversion and the Activity of Liver Serine Hydroxymethyl Transferase in the Chick

51. Research Notes. Effect of Light Intensity on Fertility of Naturally-Mated White Leghorns

(Continued on page 2121)
