# CONTENTS

## BREEDING AND GENETICS

- Linear Relationship of the Loci for Barring, Dermal Melanin Inhibitor, and Recessive White Skin on the Chicken Z Chromosome. J. J. Bitgood .......................................................... 530

## EDUCATION AND PRODUCTION

- Disparate Grower and Integrator Optimum Growout Temperatures. P. W. Aho and M. B. Timmons .......................................................... 534
- Relationship of Time of Feeding and Strain to Egg Shell Quality and Hatchability in Broiler Breeders. J. Brake .......................................................... 538
- Influence of Source and Physical Form of Xanthophyll Pigment on Broiler Pigmentation and Performance. M. D. Ouart, D. E. Bell, D. M. Janky, M. G. Dukes, and J. E. Marion .......................................................... 544

## ENVIRONMENT AND HEALTH

- Correlation of Estimated and Actual Northern Fowl Mite Populations with the Evolution of Specific Antibody to a Low Molecular Weight Polypeptide in the Sera of Infested Hens. J. A. Devaney and P. C. Augustine .......................................................... 549

## MARKETING AND PRODUCTS

## METABOLISM AND NUTRITION

- Age-Constant Versus Weight-Constant Feed Consumption and Efficiency in Broiler Chickens. J. R. Chambers and C. Y. Lin .......................................................... 565
- Further Studies of Effects of Sodium Aluminosilicate on Egg Shell Quality. D. A. Roland, Sr. .......................................................... 577
- Effects of White Lupine in Diets of Growing Turkeys. J. C. Halvorson, P. E. Waibel, and M. A. Shehata .......................................................... 596
- Nutritive Value of Wheat Screening as a Feed Ingredient for Broiler Chickens. F. G. Proudfoot and H. W. Hulan .......................................................... 615
Aflatoxin-Impaired Ability to Accumulate Oxycarotenoid Pigments During Restoration in Young Chickens. J. L. Schaeffer, J. K. Tyczkowski, J. E. Riviere, and P. B. Hamilton
Influence of Acute Feed Deprivation or Excess Feed Intake on Immunocompetence of Broiler Chicks. K. C. Klasing
Pectoralis Muscle Shortening and Rigor Development at Different Locations Within the Broiler Breast. C. M. Papa and D. L. Fletcher
Assessment of Extruded Grain Amaranth as a Feed Ingredient for Broilers. 2. Apparent Amino Acid Availability Values. P. B. Tillman and P. W. Waldroup
Further Investigation of the Dietary Protein Level-Monensin Interrelationship in Broiler Chicks: Influence of Dietary Protein Source and Type of Anticoccidial Drug. C. C. Welch, C. M. Parsons, and D. H. Baker

PHYSIOLOGY AND REPRODUCTION
Effect of Cortisol on Cutaneous Basophil Hypersensitivity to Phytohemagglutinin in Chickens. N. P. Brake, J. Brake, J. P. Thaxton, and D. L. Murray

RESEARCH NOTES
Research Note: Effect of Electrical Stunning and Hot Boning on Broiler Breast Meat Characteristics. J. W. Kim, D. L. Fletcher, and D. R. Campion
Research Note: Position of Meckel’s Diverticulum in Broiler-Type Chickens. S. L. Branton, B. D. Lott, G. W. Morgan, and J. W. Deaton
Research Note: Effect of Roasting Breast up or Breast down and Dietary Canola Meal on the Sensory Quality of Turkeys. R. E. Salmon, V. I. Stevens, L. M. Poste, V. Agar, and G. Butler
