## CONTENTS

### BREEDING AND GENETICS
Responses of Meat-Type Chickens to Choice Feeding of Diets Differing in Protein and Energy from Hatch to Market Weight.

P. B. Siegel, M. Picard, I. Nir, E. A. Dunnington, M.H.A. Willemsen, and P.E.V. Williams. 1183

Research Notes
Genetic Parameters of Survival to the Different Stages of Embryonic Death in Laying Hens.

C. Beaumont, N. Millet, E. Le Bihan-Duval, A. Kipi, and V. Dupuy. 1193

### EDUCATION AND PRODUCTION
Carcass Traits and Reproductive Development at the Onset of Lay in Two Lines of Female Turkeys.

### ENVIRONMENT AND HEALTH
Influence of a Superactivated Charcoal on the Toxic Effects of Aflatoxin or T-2 Toxin in Growing Broilers.

T. S. Edrington, L. F. Kubena, R. B. Harvey, and G. E. Rottinghaus. 1205

Preservation of Hatchery Waste by Lactic Acid Fermentation. 1. Laboratory Scale Fermentation.

A. C. Deshmukh and P. H. Patterson. 1212

Preservation of Hatchery Waste by Lactic Acid Fermentation. 2. Large-Scale Fermentation and Feeding Trial to Evaluate Feeding Value.

A. C. Deshmukh and P. H. Patterson. 1220

Yeast Treatment to Reduce *Salmonella* and *Campylobacter* Populations Associated with Broiler Chickens Subjected to Transport Stress.

J. E. Line, J. S. Bailey, N. A. Cox, and N. J. Stern. 1227

Preharvest Sources of *Salmonella* Colonization in Turkey Production.

N. J. Hoover, P. B. Kenney, J. D. Amick, and W. A. Hypes. 1232

Individual and Combined Effects of Fumonisin B1 Present in *Fusarium moniliforme* Culture Material and T-2 Toxin or Deoxynivalenol in Broiler Chicks.

### IMMUNOLOGY
Application of a Nonlinear Regression Function to Evaluate the Kinetics of Antibody Response to Vaccines in Chicken Lines Divergently Selected for Multitrait Immune Response.

S. Weigend, M. Mielenz, and S. J. Lamont. 1248

### METABOLISM AND NUTRITION
Econometric Feeding and Management for First Cycle Phase Two DeKalb Delta Hens.

H. A. Ahmad, M. M. Bryant, S. Kucuktas, and D. A. Roland, Sr. 1256

Modulation of Cholesterol Levels in Broiler Meat by Dietary Garlic and Copper.

V. H. Konjufca, G. M. Pesti, and R. I. Bakalli. 1264

R. W. Newkirk, H. L. Classen, and R. T. Tyler. 1272
Effects of Supplemental Ascorbic Acid on the Energy Conversion of Broiler Chicks During Heat Stress and Feed Withdrawal.
J. S. McKee, P. C. Harrison, and G. L. Riskowski........................................ 1278

Determination of Metabolizable Energy Contents of Feed Ingredients for Ducks.
D. Ragland, D. King, and O. Adeola.......................................................... 1287

A New Method for Determining the Availability of Choline in Soybean Meal.
J. F. M. Menten, G. M. Pesti, and R. I. Bakalli......................................... 1292

Research Notes
A Low-Protein Diet for Turkey Poults.
S. D. Boling and J. D. Firman................................................................. 1298

PHYSIOLOGY AND REPRODUCTION
Mesotocin Receptor Binding of Cortical and Medullary Kidney Tissues of the Hen.
T. Takahashi, M. Kawashima, T. Yasuoka, M. Kamiyoshi, and K. Tanaka........ 1302

Effects of Environmental and Social Factors on Incubation Behavior, Endocrinological Parameters, and Production Traits in Turkey Hens (Meleagris gallopavo).
G. Bédécarrats, D. Guémené, and M. A. Richard-Yris.................................. 1307

Research Notes
Oviposition Delays Induced by Social Stress Are Reversed by Treatment with the β-Adrenergic Blocking Agent Propranolol.
M. Reynard and C. J. Savory................................................................. 1315

PROCESSING AND PRODUCTS
Utilization of the Skin Attachment Model to Determine the Antibacterial Efficacy of Potential Carcass Treatments.

ASSOCIATION NOTES
Letters to the Editor.................................................................................. 1324
Nunc Dimittis......................................................................................... 1325
Positions Available................................................................................. 1326
