CONTENTS

ENVIRONMENT, WELL-BEING, AND BEHAVIOR

The effect of perch availability during pullet rearing and egg laying on the behavior of caged White Leghorn hens

Neopterin and biopterin as biomarkers of immune system activity associated with crating in broiler chickens

I. Bedanova, E. Voslarova, G. Zelinska, J. Blahova, P. Marsalek, and J. Chloupek .................. 2432

Performance of an image analysis processing system for hen tracking in an environmental preference chamber

Mohammad Amin Kashiha, Angela R. Green, Tatiana Glogerley Sales, Claudia Bahr, Daniel Berckmans, and Richard S. Gates ................................................................. 2439

Research Note

Fly emergence from manure of Japanese quail fed thymol- or isoeugenol-supplemented diets

I. Lynch Ianniello, M. Battán Horenstein, M. C. Lábaque, A. Luna, R. H. Marin, and R. M. Gleiser ................................................. 2449

GENETICS

Genetic parameters of egg quality traits on different pedigree layers with special focus on dynamic stiffness

IMMUNOLOGY, HEALTH, AND DISEASE

Screening of Lactobacillus strains of domestic goose origin against bacterial poultry pathogens for use as probiotics

Marta Dec, Andrzej Puchalski, Renata Urban-Chmiel, and Andrzej Wernicki ......................... 2464

Enhanced immune responses of chickens to oral vaccination against infectious bursal disease by ginseng stem-leaf saponins

L. Zhai, Y. Wang, J. Yu, and S. Hu ............................................................................... 2473

Single nucleotide polymorphism variants within tva and tvb receptor genes in Chinese chickens

METABOLISM AND NUTRITION

Effect of γ-aminobutyric acid on digestive enzymes, absorption function, and immune function of intestinal mucosa in heat-stressed chicken

Z. Chen, J. Xie, B. Wang, and J. Tang .............................................................................. 2490

Contribution of protein, starch, and fat to the apparent ileal digestible energy of corn- and wheat-based broiler diets in response to exogenous xylanase and amylase without or with protease

L. F. Romero, J. S. Sands, S. E. Indrakumar, P. W. Plumstead, S. Dalsgaard, and V. Ravindran .................................................................................................................. 2501

Alginate-whey protein dry powder optimized for target delivery of essential oils to the intestine of chickens

Y. Zhang, J. Gong, H. Yu, Q. Guo, C. Defelice, M. Hernandez, Y. Yin, and Q. Wang ........... 2514

Effect of Origanum chemotypes on broiler intestinal bacteria

Liliana Betancourt, Fernando Rodriguez, Vienvilay Phandanouvong, Claudia Ariza-Nieto, Michael Hume, David Nisbet, German Afanador-Téllez, Alexandra Martynova Van Kley, and Armen Nalian ............................................................... 2526
Effect of various sources and levels of iodine, as well as the kind of diet, on the performance of young laying hens, iodine accumulation in eggs, egg characteristics, and morphotic and biochemical indices in blood
M. Słupczyńska, D. Jamroz, J. Orda, and A. Wiliczkiewicz .................................................... 2536

Effects of the composition of the basal diet on the evaluation of mineral phosphorus sources and interactions with phytate hydrolysis in broilers

Influence of particle size and calcium source on production performance, egg quality, and bone parameters in laying ducks

Nutrient analysis, metabolizable energy, and digestible amino acids of soybean meals of different origins for broilers
V. Ravindran, M. R. Abdollahi, and S. M. Bootwalla .................................................................. 2567

Assessment of postcramble addition of limestone and calcium-specific appetite in broilers during the starter phase

Research Note
Short-term effects of lower oil dried distillers grains with solubles in laying hen rations
Sheila Purdum, Kathy Hanford, and Brett Kreifels ................................................................ 2592

MOLECULAR, CELLULAR, AND DEVELOPMENTAL BIOLOGY
Folate supplementation modifies CCAAT/enhancer-binding protein α methylation to mediate differentiation of preadipocytes in chickens
Xiaoqiong Yu, Ranran Liu, Guiping Zhao, Maiqing Zheng, Jilan Chen, and Jie Wen ............ 2596

PHYSIOLOGY, ENDOCRINOLOGY, AND REPRODUCTION
Effects of moment of hatch and feed access on chicken development
D. M. Lamot, I. B. van de Linde, R. Molenaar, C. W. van der Pol, P. J. A. Wijtten, B. Kemp, and H. van den Brand ................................................................. 2604

Corticosterone metabolites in laying hen droppings—Effects of fiber enrichment, genotype, and daily variations
M. Alm, L. Holm, R. Tauson, and H. Wall ............................................................................. 2615

Research Note
Effect of the timing of posthatch feed restrictions on the deposition of fat during broiler breast muscle development
S. G. Velleman, C. S. Coy, and D. A. Emmerson .................................................................. 2622

PROCESSING, PRODUCTS, AND FOOD SAFETY
Effects of alkaline concentration, temperature, and additives on the strength of alkaline-induced egg white gel
Yan Zhao, Yonggang Tu, Jianke Li, Mingsheng Xu, Youxian Yang, Xuliang Nie, Yao Yao, and Huaying Du ................................................................................... 2628

Antimicrobial efficacy of lauric arginate against *Campylobacter jejuni* and spoilage organisms on chicken breast fillets
Divek V. T. Nair, Rama Nannapaneni, Aaron Kiess, Barakat Mahmoud, and Chander Shekhar Sharma ................................................................. 2636

Response surface optimization of enzymatic hydrolysis of duck blood corpuscle using commercial proteases
Zhaojun Zheng, Yan Huang, Rujuan Wu, Longmei Zhao, Chunfeng Wang, and Rijun Zhang ................................................................................... 2641
Effect of high-dose irradiation on quality characteristics of ready-to-eat broiler breast fillets stored at room temperature
E. T. Mársico, C. A. Conte Júnior, and S. B. Mano ............................................................... 2651

The effect of eggshell apex abnormalities on table egg quality during storage in 2 seasons of the year
M. D. M. Brandão, F. F. Santos, L. S. Machado, M. S. Verinaud, J. M. Oliveira,
N. M. Soares, E. R. Nascimento, and V. L. A. Pereira ........................................................... 2657

Analysis of abietic acid and dehydroabietic acid residues in raw ducks and cooked ducks
Yongzhi Zhu, Suzhen Zhang, Zhiming Geng, Daoying Wang, Fang Liu, Muhan Zhang,
Huan Bian, and Weimin Xu..................................................................................................... 2663

Sequential separation of immunoglobulin Y and phosvitin from chicken egg yolk without using organic solvents
Hyun Yong Lee, E. D. N. S. Abeyrathne, Inwook Choi, Joo Won Suh,
and Dong UK Ahn................................................................................................................... 2668

Enzymatic hydrolysis of ovalbumin and the functional properties of the hydrolysates

ERRATUM
Erratum to “Molecular cloning, characterization, and expression of pannexin genes in chicken”
[Poult. Sci. 93(9): 2253–2261]
Tae-Jun Kwon, Dong-Bin Kim, Jae Woong Bae, Borum Sagong, Soo-Young Choi,
Hyun-Ju Cho, Un-Kyung Kim, and Kyu-Yup Lee .................................................................. 2687
